

Abstract

Title: An outline of the development of the Czech sport financing after 1989

Objectives: The main aim of this thesis is to analyse the development of the czech sport financing from the selected resources after 1989 till the present situation and it's prospect included in The concept sports funding 2016 - 2025 SPORT 2025

Methods: The basic method used in this thesis is the method of document analysis. Fundamental documents include legislative documents, especially The Lottery Act and its updating and The Act on Promotion of Sports. Additional resources represent analytic and comparative studies prepared by ČOV, ČUS and MŠMT conception. Another method is statistic analysis of quantitative data, in form of termportal lines, which are processed into basic charts and diagrams.

Results: In recent 25 years have been significant changes in sports funding established. The turning point is considered the year 2011, when czech sport lost two stable financial resources. Primarily the company Sazka, a.s. went bankrupt, secondarily the amendment of the lottery act was accepted and has discontinued oftakes for public utility objects. Since then an optimal sports funding system is sought. State sports support shows a long-term downward trend and belongs to the lowest rank in the EU comparison. efforts to improve sports funding conditions culminate by the new government Conception SPORT 2025 admission in June 2016

Key words: sport financing resources, The Lottery Act, Sazka, state sports support, government conception
